

Invitation

Community Climate Summit

To: Mayors, Councillors and Regional District Directors

From: BC Mayors Climate Leadership Council

Re: **Peer Learning Event: 1:30 pm-3:30 pm Feb. 5, 2015 in Richmond after LGLA 2016 Leadership Forum**

Objective

Communities are engaged in saving energy, emissions, and money in their own operations and helping their residents and businesses to do the same. There is no specific manual for local government elected officials.

Get Answers: How are neighboring communities saving energy, emissions, and money in their operations? What about community-wide? What are your neighboring governments doing to recirculate money in the local economy rather than send it away? What has your local government committed to?

Those attending this half day workshop will walk away with increased knowledge of what your peers are doing, identification of opportunities for your community, an appreciation of the challenges and discuss ways to overcome, and a network of peers in your region. Those with experience will share it with colleagues.
